About Professor Borchert Regents' Professor Emeritus John R. Borchert "In a period of intellectual flux, when geography seems tempted to follow nongeographical sirens of transient glamour, John Borchert always manages to anchor the discipline's sense of identity on the rock of cartographic information."

About Professor Borchert · University of Minnesota Libraries

Borchert's epochs refer to five distinct periods in the history of American urbanization and are also known as Borchert's model of urban evolution. Each epoch is characterized by the impact of a particular transport technology on the creation and differential rates of growth of American cities. This model was conceptualized by University of Minnesota geographer John R. Borchert in 1967.
