Subaru Piston and Rings

The "ringland" portion of the piston holds the piston rings via channels cut into the piston head. On the Subaru EJ255 and EJ257, there are three ringlands, which each have a separate job in regards to protecting the engine and piston. In some cases, these ringlands have been identified as the weak point on most Subaru engines.

How to Avoid Piston Failure | Subaru Performance Tips

Types of Subaru Engines. The first Subaru Engine used in the US is the E series. Most Subarus you see on the road today have an EJ, and in 2011, Subaru introduced a completely redesigned engine, the F series. FA and FB engines are beginning to replace all EJ engines, with only the EJ257 still in the STI as of 2019.

Everything you need to know about your Subaru Engine ...

So, when a timing belt is set in the incorrect position (or wears out), valves can be smashed by the pistons and severe engine damage occurs. With most cars, timing is set to top dead center on number 1 piston. But on a Subaru with their funny horizontal boxer engine, it is set at mid-stroke.

How to set timing (timing belt change) on a Subaru SOHC EJ25

The JASPER remanufactured Subaru 2.5L SOHC boxer engine is covered by JASPER's 3-Year/100,000 mile nationwide transferable parts and labor warranty. Full warranty disclosure is available on our website, or upon request.

JASPER Offers Remanufactured Subaru 2.5L SOHC Boxer Engine ...

The original Subaru piston has almost no skirt, causing the cylinder bore to wear in the middle, eventually causing "piston slap". We use Hastings piston rings, which are very high quality rings. The engine comes with a new factory Subaru High Volumn Oil Pump. This is the oil pump that Subaru uses in their EJ25 Turbo Engines.

Rebuilt Subaru Engines

-Ensure the arrow on connecting rod cap faces the front during installation. This is for 09 sti connecting rods. The marked face should be the 4 and three dots bigger to smaller.

which way do the conn. rods face ? - NASIOC

The Subaru EJ engine is a series of four-stroke automotive engines manufactured by Subaru.They were introduced in 1989, intended to succeed the previous Subaru EA engine.The EJ series is the mainstay of Subaru's engine line, with all engines of this series being 16-valve horizontal flat-fours, with configurations available for single, or double-overhead camshaft arrangements (SOHC or DOHC).

Subaru EJ engine - Wikipedia

The engine in the 1998 (2.5) never gave me any issues after the shortblock and head gaskets. I sold the car to a friend who's being driving the car since, past 14 months almost. So my question is, if you're going to be removing the engine, why not just install new head gaskets, or get a rebuilt 2.5 that's been fixed.

Replace 2.5 (EJ25D) DOHC with 2.0 (EJ20) SOHC? | Subaru ...

grade ranges. Corresponding Grade A and B pistons will have a piston to wall clearance range of .0023"- .0031". The piston to wall clearance gauge point for all Subaru graded pistons is 0.850" from the bottom of the oil ring. This engine was produced since 1995 and was the biggest engine of the EJ family. It was widely applied in all main car models . Subaru EJ25 engine used the aluminum cylinder block with dry sleeves. It is similar to the EJ20 cylinder block, but diameter of cylinders was increased to 99.5 mm, cylinder block deck height remained the same (201 mm).

Subaru EJ25 Engine | Tuning guide, main problems, specs

Subaru firmly believes that the Horizontally-Opposed Engine is the optimum design for driving enjoyment. The pistons face away from each other in a 180º... Since the Horizontally-Opposed Engine is structured with the pistons mounted horizontally, it has a lower total height and is more compact and lighter than an in-line engine or a V engine.
