This is the method I used to lower my own Peugeot 306 GTi-6. I would like to point out that the torsion bars had previously been removed, cleaned & greased & refitted. The o/s torsion bar was seized into the trailing arm, which is very common if they've been in for a few years & needed a 10 tonne hydraulic puller to free it. I would suggest you make sure both bars move freely before making any ...
